-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 21 June 2004.
 2a) This action is FINAL. 2b) This action is non-final.
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1,2,5 and 7 is/are pending in the application.
 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
 5) Claim(s) _____ is/are allowed.
 6) Claim(s) 1-2, 5 and 7 is/are rejected.
 7) Claim(s) _____ is/are objected to.
 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Amendment

1. This action is in response to the amendment mailed June 21, 2004. Claims 1-2, 5 and 7 were amended rendering claims 1-2, 5 and 7 pending.

Claim Rejections – 35 USC § 103(a)

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-2, 5 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Longo et al (US 3,723,165).

Longo discloses a thermally sprayed article, using flame spraying, for applying metal and plastic coatings (column 1, lines 7-49) where the plastics include polymers (column 1, lines 65-68). Longo discloses a metal substrate material can be sprayed on the article to form an inner layer (column 3, lines 54-60) where the sprayed coating forms the outer layer. Longo discloses the mixture of plastic powder and metal are co-deposited (column 2, lines 46-60) where the bond coat has a thickness of 0.005 inches and the top coat has a thickness of 0.001 inches (column 4, lines 15-20) resulting in the hardness of the outer layer being less than that of the inner layer. This would be

inherent, because the plastic/metal mixture would be softer than the base metal alone.

Although Longo does not explicitly disclose the inner layer is thermally sprayed, it would have been obvious to the average artisan that the inner coating is made by a specified form of thermal spraying, which is flame spraying.

Response to Arguments

4. Applicant's arguments to rejection made under 35 U.S.C. 103(a) as being unpatentable over Longo et al (US 3,723,165) has been considered, but is unpersuasive. Applicant argues Longo does not disclose an inner layer of a metal material thermally sprayed on an article substrate and having a first predetermined thickness and an outer layer flame of a composite made of a polymer material and the metal material sprayed on the inner layer and having a second predetermined thickness. Examiner respectfully disagrees because Longo discloses a metal material can be sprayed on the article to form an inner layer (column 3, lines 54-60) where the sprayed coating forms the outer layer. Longo discloses the mixture of plastic powder and metal are co-deposited (column 2, lines 46-60) where the bond coat has a thickness of 0.005 inches and the top coat has a thickness of 0.001 inches (column 4, lines 15-20) resulting in the hardness of the outer layer being less than that of the inner layer. Applicant further argues Longo does not thermally spray a metal material against an article substrate to form an inner layer before flame spraying. The thermally sprayed article of Longo is flame sprayed to form the inner and outer layers of metal/ polymer

and metal layers. The inner coating is made by a specified form of thermal spraying, which is flame spraying.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lawrence Ferguson whose telephone number is 571-272-1522. The examiner can normally be reached on Monday through Friday 9:00 AM – 5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye, can be reached on 571-272-3186. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
